THE JOURNAL OF

HEAD TRAUMA REHABILITATION

SHELDON BERROL, MD MITCHELL ROSENTHAL, PhD, EDITORS

CUMULATIVE INDEX TO VOLUMES 1-6

AN ASPEN PUBLICATION®

The Journal of Head Trauma Rehabilitation®

The Journal of Head Trauma Rehabilitation (ISSN: 0885-9701) is published quarterly for $66.00 by Aspen Publishers, Inc., 7201 McKinney Circle, Frederick, MD 21701. Second-class postage paid at Frederick, Maryland. **Postmaster:** Send address changes to *Journal of Head Trauma Rehabilitation*, 7201 McKinney Circle, Frederick, MD 21701.

Subscription rate is $66.00 (plus $5.00 postage and handling) per year in the United States and Canada (four issues), payable in advance. Subscribers may specify any issue to begin the subscription. **Subscribers in the United States and Canada:** Address customer service inquiries to Fulfillment, Aspen Publishers, Inc., 7201 McKinney Circle, Frederick, MD 21701, or call 1-800-234-1660. To place an order, call 1-800-638-8437. **Subscribers in Japan:** Address subscription inquiries to Woodbell Scope, Inc., Mansui Bldg., 9-18, Kanda-Surugadai 2-chome, Chiyoda-ku, Tokyo 101, Japan. **Subscribers in all countries other than the United States, Canada, and Japan:** Address subscription inquiries to Swets Publishing Service, P.O. Box 825, 2160 SZ Lisse, The Netherlands.

Single copies: $18.50 each; enclose payment with order. **Four or more copies:** $16.50. **For quantities in bulk (25 or more), contact:** Aspen Publishers, Inc., Bulk/Special Sales Department, 200 Orchard Ridge Dr., Gaithersburg, MD 20878. Telephone 1-800-638-8437.

Advertising: Direct inquiries to Frances S. Ray, Aspen Publishers, Inc., 200 Orchard Ridge Dr., Gaithersburg, MD 20878. Telephone: 301-417-7584. The appearance of advertising herein does not constitute endorsement of those products and services by the authors, editors, or publishers of this journal.

Purpose of journal: JHTR is a peer-reviewed journal that provides information on clinical management and rehabilitation of the head injured for the practicing professional.

Information for authors: Readers interested in submitting articles for possible publication should send them to Journal Editor, Sheldon Berrol, MD, Chief, Rehabilitation Medicine, San Francisco General Hospital, Room GC4, 1001 Potrero Avenue, San Francisco, CA 94110. Detailed author guidelines are available on request.

Microform and article reprints: This publication is available in microform from University Microfilms International, 300 North Zeeb Rd., Department Article Reprints, Ann Arbor, MI 48106. Article reprints are also available in quantities up to 99 from University Microfilms International, UMI Article Clearinghouse, at the same address. To order 100 or more reprints, contact Reprints, Aspen Publishers, Inc., 200 Orchard Ridge Dr., Gaithersburg, MD 20878.

Indexing: Articles are cited in the *Family Resources Database, Cumulative Index to Nursing & Allied Health Literature, Excerpta Medica*, and *The American Psychological Assessment Exchange*.

Abstracts: JHTR is abstracted in *Psychological Abstracts*.

Copyright and permissions: Copyright © 1991 by Aspen Publishers, Inc. All rights reserved. Aspen Publishers, Inc., grants permission for copies of articles in this issue to be made for personal or internal use, or for the personal or internal use of specific clients registered with the Copyright Clearance Center. This consent is given on the condition, however, that the copier pay a $2.00 fee for the photocopy through the Copyright Clearance Center, Inc. (CCC), for copying beyond that permitted by the U.S. Copyright Law. The $2.00 fee should be paid directly to the CCC, 27 Congress St., Salem, MA 01970. 0885-9701/91 $2.00.

This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Requests for permission to reprint material from this journal should be addressed to Permissions Department, Aspen Publishers, Inc., 200 Orchard Ridge Dr., Gaithersburg, MD 20878.

Drug and dosage selection: The authors have exerted every effort to ensure that drug selection and dosage set forth in this text are in accord with recommendations and practice current at the time of publication. However, we suggest that appropriate information sources be consulted when dealing with new and unfamiliar drugs. It remains the responsibility of every practitioner to evaluate the appropriateness of a particular opinion in the context of the actual clinical situation and with due consideration to any new developments in the field.

Editorial board

Editors:

Sheldon Berrol, MD, Associate Clinical Professor, University of California, San Francisco, Chief, Rehabilitation Medicine, San Francisco General Hospital, San Francisco, California

Mitchell Rosenthal, PhD, Professor of Physical Medicine and Rehabilitation, Adjunct Professor of Psychology, Wayne State University School of Medicine, Vice President, Research and Development, Rehabilitation Institute of Michigan, Project Director, Southeastern Michigan Traumatic Brain Injury System, Detroit, Michigan

Special feature editors:

Mel B. Glenn, MD, Associate Professor, Department of Rehabilitation Medicine, Tufts University School of Medicine, Director, Rehabilitation Medicine, Greenery Rehabilitation and Skilled Nursing Center, Boston, Massachusetts

Kenneth I. Kolpan, Esq, Attorney, Law Offices of Kenneth I. Kolpan, PC, Assistant Professor of Rehabilitation Medicine, Tufts University School of Medicine, Boston, Massachusetts

William J. Lynch, PhD, Director, Brain Injury Rehabilitation Unit, Veterans Administration Medical Center, Palo Alto, California

Nathaniel H. Mayer, MD, Director, Drucker Brain Injury Center, Moss Rehabilitation Hospital, Professor of Rehabilitation Medicine, Department of Physical Medicine and Rehabilitation, Temple University School of Medicine, Philadelphia, Pennsylvania

Editorial board:

Brenda B. Adamovich, PhD, Administrative Director, Department of Physical Medicine and Rehabilitation, Albany Medical Center, Albany, New York, Associate Professor of Physical Medicine and Rehabilitation, Albany Medical College, Albany, New York

Jeffrey T. Barth, PhD, Director, Neuropsychology Laboratory, Associate Professor, Behavioral Medicine and Psychiatry, University of Virginia Medical School, Charlottesville, Virginia

Yehuda Ben-Yishay, PhD, Associate Professor, Clinical Rehabilitation Medicine, Director, Head Trauma Program, Department of Rehabilitation Medicine, New York University Medical Center, Rusk Institute of Rehabilitation Medicine, New York, New York

Cynthia F. Berrol, PhD, Professor, Department of Kinesiology and Physical Education, California State University, Hayward, California

Bruce Caplan, PhD, Chief Psychologist, Department of Rehabilitation Medicine, Thomas Jefferson University Hospital, Associate Professor, Department of Rehabilitation Medicine, Thomas Jefferson Medical College, Philadelphia, Pennsylvania

Roger F. Cohen, PhD, Director of Neuropsychology, Doctor Solomon Carter Fuller Mental Health Center, Boston, Massachusetts

D. Nathan Cope, MD, Vice President and Chief of Medical Services, Neurocare, Inc., Concord, California

Linda N. Diehl, RN, MS, CNAA, Baltimore, Maryland

Marcel Dijkers, PhD, Director of Research, Rehabilitation Institute of Michigan, Assistant Professor of Physical Medicine and Rehabilitation, Wayne State University, Detroit, Michigan

Peter Eames, MA, MSc, MB, MRCP, MRCPsych, Consultant Neuropsychiatrist, The Burden Neurological Hospital, Clinical Teacher in Neuropsychiatry, Department of Mental Health, University of Bristol, Bristol, England

Bruce M. Gans, MD, Professor and Chairman, Department of Physical Medicine and Rehabilitation, Wayne State University, President and Chief Executive Officer, Rehabilitation Institute of Michigan, Detroit Medical Center, Detroit, Michigan

Douglas E. Garland, MD, Chief, Central Nervous System Division, Department of Surgery, Rancho Los Amigos Medical Center, Downey, California, Clinical Professor, Department of Orthopedics, University of Southern California

Lynn Grahame, MSW, Social Worker, Drucker Brain Injury Center, Assistant Director, Department of Social Work, Moss Rehabilitation Hospital, Philadelphia, Pennsylvania

Ernest R. Griffith, MD, Private Practice, Phoenix, Arizona

William J. Haffey, PhD, Executive Director, Sharp Rehabilitation Hospital, San Diego, California

Douglas E. Harrington, PhD, Licensed Psychologist/Consulting Neuropsychologist, Handicapped Students' Programs and Services, Coastline Community College, Costa Mesa, California

Harvey E. Jacobs, PhD, Associate Research Psychologist, Department of Psychiatry and Biobehavioral Sciences, Neuropsychiatric Institute, UCLA Medical Center, Los Angeles, California

William E. Kiernan, PhD, Director, Training and Research Institute for People with Disabilities, Children's Hospital, Adjunct Professor, Department of Counseling Psychology, University of Massachusetts at Boston, Boston, Massachusetts

Jeffrey Scott Kreutzer, PhD, Associate Professor, Department of Rehabilitation Medicine, Division of Neurological Surgery, Medical College of Virginia, Richmond, Virginia

Jeri A. Logemann, PhD, Professor and Chairman, Communication Sciences and Disorders, Northwestern University, Evanston, Illinois

Robert L. Mapou, PhD, Neuropsychology Director, HIV Behavioral Medicine Research Program, Henry M. Jackson Foundation for the Advancement of Military Medicine, Clinical Associate Professor of Neurology (Psychology), Georgetown University School of Medicine, Washington, DC

J. Douglas Miller, MD, PhD, Professor of Surgical Neurology, Western General Hospital, Edinburgh, Scotland

Noel Rao, MD, Assistant Vice President, Medical Services, Marianjoy Rehabilitation Center, Wheaton, Illinois, Associate Professor of Physical Medicine and Rehabilitation, Rush University School of Medicine, Chicago, Illinois

Maurice Rappaport, MD, PhD, Academic Administrator, Langley-Porter Psychiatric Institute, University of California, San Francisco, University of California Brain Function Study Unit, Research Department, Agnews Developmental Center, San Jose, California

Robert J. Sbordone, PhD, ABCN, ABPN, Clinical Neuropsychologist, Orange County Neuropsychology Group, Fountain Valley, California, Assistant Clinical Professor, Departments of Neurosurgery, Physical Medicine, and Rehabilitation, University of California at Irvine, School of Medicine, Irvine, California

Marilyn Price Spivack, President, MPS Associates, Inc., Framingham, Massachusetts

Steven L. Wolf, PhD, PT, Professor, Center for Rehabilitation Medicine, Director of Research, Department of Rehabilitation Medicine, Emory University School of Medicine, Atlanta, Georgia

Nathan David Zasler, MD, Director, Brain Injury Rehabilitation Services, Assistant Professor of Physical Medicine and Rehabilitation, Medical College of Virginia, Richmond, Virginia

Barbara Zoltan, MA, OTR, Consultant/Private Practice, Saratoga, California, Lecturer, Department of Occupational Therapy, San Jose State University, San Jose, California

Cumulative Contents to Volumes 1 through 6

1:1 March 1986
The Persistent Vegetative State
Sheldon Berrol, MD, Issue Editor

1:2 June 1986
Minor Head Injury
Jeffrey T. Barth, PhD, Issue Editor

1:3 September 1986
Attention and Memory
John Whyte, MD, PhD, Issue Editor

1:4 December 1986
Pediatric Head Injury
Kenneth M. Jaffe, MD, Issue Editor

2:1 March 1987
Educational, Vocational, and Social Reintegration
Mitchell Rosenthal, PhD, Issue Editor

2:2 June 1987
Orthopedic Management
Douglas Garland, MD, Issue Editor

2:3 September 1987
Evaluation of Outcome
William J. Haffey, PhD, Issue Editor

2:4 December 1987
Psychopharmacology
D. Nathan Cope, MD, Issue Editor

3:1 March 1988
Neuropsychological Assessment
Robert L. Mapou, PhD, Issue Editor

3:2 June 1988
Treatment of Communicative Dysfunction
Chris Hagen, PhD, Issue Editor

3:3 September 1988
Management of Behavior Disorders
Peter Eames, MRCP, MRCPsych, Issue Editor

3:4 December 1988
Families of the Brain Injured
Michael R. Bond, MD, PhD, Issue Editor

4:1 March 1989
Ethical and Legal Issues
John D. Banja, PhD, Issue Editor

4:2 June 1989
Visual System Dysfunction
Barbara Zoltan, MA, OTR, Issue Editor

4:3 September 1989
Cognitive Rehabilitation
Jeffrey S. Kreutzer, PhD, Issue Editor

4:4 December 1989
Swallowing Disorders and Rehabilitation
Jeri A. Logemann, PhD, Issue Editor

5:1 March 1990
Lifelong Living
Harvey E. Jacobs, PhD, Issue Editor

5:2 June 1990
Sexuality and Head Injury
W.F. Blackerby, PhD

5:3 September 1990
Substance Abuse and Traumatic Brain Injury
Jeffrey T. Barth, PhD, and
Mitchell Rosenthal, PhD, Issue Editor

5:4 December 1990
Management of Motor Dysfunction
Stephen L. Wolf, PhD, Issue Editor

6:1 March 1991
School Reentry Following Head Injury
Roberta DePompei, MA and Jean L. Blosser EdD, Issue Editors

6:2 June 1991
Injury Prevention
Elizabeth McLoughlin, ScD and Andrew McGuire

6:3 September 1991
Models of Vocational Rehabilitation
Paul H. Wehman, PhD, and Jeffrey S. Kreutzer PhD

6:4 December 1991
Psycho Therapeutic Interventions After Traumatic Brain Injury
George P. Prigatano, PhD, Issue Editor

Subject Index

A

Acetabulum
The orthopedic management of extremity injuries in head trauma, Botte MJ, Moore TJ, 2(2):23
Acetylcholine
The pharmacology of attention and memory, Cope DN, 1(3):36
Adolescents
Functional evaluation of adolescent students with traumatic brain injury, Milton SB, Scaglione C, Flanagan T, Cox JI, Rudnick FD, 6(1):35
Affective disorders
The use of lithium for behavioral and affective disorders after traumatic brain, Glenn MB, Joseph AB, 2(4):68
Aggressive behavior
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):18
Neurochemical substrates of aggression: Toward a model for improved intervention: (part 1), Cassidy JW, 5(2):83
Neurochemical substrates of aggression: Toward a model for improved intervention: (part 2), Cassidy JW, 5(3):70
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury: (part 1), Glenn MB, 2(1):71
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury: (part 2), Glenn MB, 2(2):80
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury: (part 3), Glenn MB, 2(3):85
Airway management
Acute management of the multiply injured head trauma patient, Haanscom DA, 2(2):6
Alcohol use
Alcohol abuse and neurological outcome of the severely head injured, Ruff RM, Marshall LF, Klauber MR, Blunt BA, Grant I, Foulkes MA, Eisenberg H, Jane J, Marmarou A, 5(3):21
Alcohol and head trauma: Strategies for prevention, Jernigan DH, 6(2):48
Alcohol use among persons with traumatic brain injury, Kreutzer JS, Doherty KR, Harris JA, Zasler ND, 5(3):9
Effects of prior alcohol use on head injury recovery, Sparadeo FR, Gill D, 4(1):75
The incidence, impact, and treatment of substance abuse in head trauma rehabilitation, Sparadeo FR, Strauss D, Barth JT, 5(3):1
Neuromedical aspects of alcohol use following traumatic brain injury, Zasler ND, 6(4):*
Alertness *See* Attention
Alexia
Supportive psychotherapy for a patient exhibiting alexia without agraphia, O'Brien KP, Prigatano GP, 6(4):*
All-terrain vehicles
All-terrain vehicles: A case study in law and the prevention of injuries, Teret SP, Jagger J, 6(2):60
Amino acids
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):24
Amnesia
Amnesia and the law, Kolpan KI, 1(3):81
Neuroanatomical correlates of attention and memory disorders in traumatic brain injury:An application of neurobehavioral subtypes, Auerbach SH, 1(3):9
Neuropsychology of attention and memory, Nissan MJ, 1(3):15
Prospective assessment of posttraumatic amnesia: A comparison of the GOAT, Mystic WJ, Corrigan JD, Carpenter D, Chock SKL, 5(1):65
Ankle
The orthopedic management of extremity injuries in head trauma, Botte MJ, Moore TJ, 2(2):26
Anticonvulsants
Anticonvulsants for prophylaxis of post-traumatic seizures, Glenn MB, 1(1):73
Anticonvulsants reconsidered, Glenn MB, 6(3):85
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):21
The pharmacology of attention and memory, Cope DN, 1(3):39
Antidepressants
The choice of antidepressants in depressed survivors of traumatic brain injury, Glenn MB, Wroblewski BA, 4(3):85
Fluoxetine: A new serontonergically active antidepressant, Cassidy JW, 4(2):67
The pharmacology of attention and memory, Cope DN, 1(3):38
Antihypertensives
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):19
Antipsychotics
Antipsychotics and their use after traumatic brain injury, Cardenas DD, 2(4):43
Aphasia
Treatment of aphasia: A process approach, Hagen C, 3(2):23
Arousal
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):40
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 1), Glenn MB, 2(1):72
Arthrodesis
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):43
Aspiration pneumonia
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):45
Attention disorders
Clinical assessment of disorders of attention and memory, Mack JL, 1(3):22
Neuroanatomical correlates of attention and memory disorder in traumatic brain injury: An application of neurobehavioral subtypes, Auerbach SH, 1(3):1
Neurobehavioral sequelae following head injury in children:educational implications, Ewing-Cobbs L, Fletcher JM, Levin HS, 1(4):60
Neuropsychological assessment of head-injured children
Fay G, Janesheski J, 1(4):19
Neuropsychology of attention and memory, Nissen MJ, 1(3):13
Outcome evaluation in the remediation of attention and memory deficits, Whyte J, 1(3):64
A pharmacologic approach to aggressive disruptive behaviors after

Attention disorders *(cont'd)*
traumatic brain injury (part 1), Glenn MB, 2(1):72
The pharmacology of attention and memory, Cope DN, 1(3):34
A practical clinical approach to understanding and treating attentional problems, Weber AM, 5(1):73
Rehabilitation of patients with disorders of attention, Wood RL, 1(3):43
Auditory disorders
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):36
Auditory evoked potential
Brain evoked potentials in coma and the vegetative state, Rappaport M, 1(1):18
Awareness
Awareness and compensation in postacute head injury rehabilitation, Crosson B, Barco PP, Velozo CA, Bolesta MM, Cooper PV, Werts D, Brobeck TC, 4(3):46
Cognitive retraining after traumatic brain injury and its role in facilitating awareness, Klonoff PS, O'Brien KP, Prigatano GP, Chiapello DA, Cunningham M, 4(3):37

B

Balance
A systems analysis of postural dyscontrol in traumatically brain-injured patients, Shumway-Cook A, Olmscheid R, 5(4):51
Behavior
An evaluation of a neuropsychologically based reeducation project for the head-injured child, Light R, 2(1):16
Behavioral and psychosocial sequelae of pediatric head injury, McGuire TL, Rothenberg MB, 1(4):1
Behavior disorders after severe head injuries: Their nature and causes and strategies for management, Eames P, 3(3):1
Clinical aspects of psychopharmacological treatment in head-injured patients, O'Shanick GJ, 2(4):60
Drug-induced modifications of behavioral recovery following cortical trauma, Sutton RL, Weaver MS, Feeney DM, 2(4):50
Neurobehavioral sequelae following head injury in children:Educational implications, Ewing-Cobbs L, Fletcher JM, Levin HS, 1(4):36
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):36
The use of lithium for behavioral and affective disorders after traumatic brain injury, Glenn MB, Joseph Ab, 2(4):68
Behavior management
Behavior management for community reintegration, Hogan RT, 3(3):62
Behavior management in the acute care rehabilitation setting, Howard ME, 3(3):14
Management of behavior disorders in a day treatment setting, Wood R, 3(3):53
The place of drugs in the management of behavior disorders after traumatic brain injury, Rose MJ, 3(3):7
Behavior therapy
Neuropsychological assessment and behavior therapy: New directions in head trauma rehabilitation, Horton AM, Barrett D, 3(1):57
Perils (hidden and not so hidden) for the token economy, Turnbull J, 3(3):46
Practical token economies, Blackerby WF, 3(3):33
Beta-blockers
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):19
Biofeedback
The use of biofeedback in the treatment of incontinence due to head injury, Tries J, 5(4):91
Bladder management
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB 1(1):49
Body movement
Effect of trunk control and alignment on limb function, Fisher B, 2(2):72
Bowel management
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB 1(1):49
Brachial plexus block
The orthopedic management of spasticity, Keenan MAE, 2(2):63
Brain injury
Ethical and legal aspects of psychotropic medications in brain injury, Haas JF, 2(4):6
Occurrence, severity, and outcomes of brain injury, Sorenson SB, Kraus JF, 6(2):1
Rehabilitation effectiveness with severe brain injury: Translating research into policy, Aronow HU, 2(3):24
See also Traumatic brain injury
Brain stem
Acute management of the multiply injured head trauma patient, Hanscom DA, 2(2):7
Mechanisms and pathophysiology of cerebral concussion, Gennarelli TA, 1(2):26
Buspirone
Buspirone: Neuropsychiatric effects, Gualtieri CT, 6(1):90

C

Casts
Serial casting: Clinical applications for the adult head-injured patient, Zablotny C, Andric MF, Gowland C, 2(2):47
Catecholamines
The pharmacology of attention and memory, Cope DN, 1(3):37
Central nervous system
Brain evoked potentials in coma and the vegetative state, Rappaport M, 1(1):17
CNS stimulants: applications for traumatic brain injury, Glenn MB, 1(4):74
The pharmacology of attention and memory, Cope DN, 1(3):35
Cerebral cortex
Mechanisms and pathophysiology of cerebral concussion, Gennarelli TA, 1(2):26
Clonidine
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):21
Closed-head injury
Clinical assessment of disorders of attention and memory, Mack JL, 1(3):25
Focus on clinical research: Perceptions of memory function in individuals with closed-head injury, Mateer CA, Sohlberg MM, Crinean J, 2(3):74

Mild closed head injury and cognitive deficits in spinal-cord-injured patients:Incidence and impact, Morris J, Roth E, Davidoff G, 1(2):31
See also Head injury

Cognition
An update on research in computer-assisted cognitive retaining, Lynch W, 2(4):93
Cognitive impairment and remediation: Implications for employment following traumatic brain injury, Wehman PH, Kreutzer JS, Sale P, West M, Morton MV, Diambra J, 4(3):66
Cognitive rehabilitation and community readaptation: Outcomes form two program models, 2(3):51
Computer-assisted cognitive retraining, Lynch W, 1(2):77
A laboratory model for testing methods of improving cognitive outcome following traumatic brain injury, Hayes R, Clifton G, Kreutzer JS, 4(3):9
Microcomputers and cognitive retraining, Lynch W, 1(1):79
Mild closed head injury and cognitive deficits in spinal-cord-injured patients: incidence and impact, Morris J, Roth E, Davidoff G, 1(2):31

Cognitive rehabilitation
Application of neuropsychological test results to interdisciplinary cognitive rehabilitation with head-injured adults, Tankle RS, 3(1):24
Cognitive rehabilitation of severely closed-head-injured patients using computer-assisted and noncomputerized treatment techniques, Batchelor J, Shores EA, Marosszeky JE, Sandanam J, Lovarini M, 3(3):78
Cognitive remediation: Issues in research and practice, Gordon WA, Hibbard MR, Kreutzer JS, 4(3):76
Cognitive retraining after traumatic brain injury and its role in facilitating awareness, Klonoff PS, O'Brien KP, Prigatano GP, Chiapello DA, Cunningham M, 4(3):37
Ethics in computer-assisted cognitive retraining, Lynch W, 4(1):91
A history of cognitive rehabilitation of head-injured patients, 1915 to 1980, Boake C, 4(3):1
Microcomputers in cognitive rehabilitation: New directions, Lynch WJ, 4(3):92

Coma
Brain evoked potentials in coma and the vegetative state, Rappaport M, 1(1):15
Evolution and the persistent vegetative state, Berrol S, 1(1):8
Pediatric head injury:Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):31
Prognosis in coma and the persistent vegetative state, Bartkowski HM, Lovely MP, 1(1):1
Rehabilitative optometric services for persons emerging from coma, Gianutsos R, Perlin R, Mazerolle KA, Trem N, 4(2):17

Coma care centers
Family reactions to persistent vegetative state, Jacobs HE, Muir Ca, Cline JD, 1(1):58

Communication
Assessment and treatment of cognitive-communicative impairments in the closed-head-injury patient: A neurobehavioral-systems approach, Sbordone RJ, 3(2):55
Augmentative communication: Assessment, system selection, and usage, DeRuyter F, Becker MR, 3(2):35
Cognitive communication impairments: A family-focused viewpoint, DePompei R, Zarski JJ, Hall DE, 3(2):13
Language and communication disorders following pediatric head injury, Ylvisaker M, 1(4):48
Management of subtle cognitive communication deficits, Milton SB, 3(2):1
Standard and special word processors as communication aids, Lynch W, 2(3):90
Treatment of aphasia: A process approach, Hagen C, 3(2):23
The use of microcomputers in the treatment of cognitive-communicative impairments, Story TB, Sbordone RJ, 3(2):45

Community reentry
Behavior management for community reintegration, Hogan RT, 3(3):62
Cognitive rehabilitation and community readaptation: Outcomes from two program models, 2(3):51
Locating community resources for lifelong living, Beals MP, Mathews RM, Elkins SR, Jacobs HE, 5(1):31
Social role valorization: aAmodel for community reentry, Condeluci A, Gretz-Lasky S, 2(1):49

Competency
The assessment of clinical competency to consent to medical rehabilitative interventions, Haffey WJ, 4(1):43

Computers
A Computer-Based Visual Communication System, Lynch W, 3(2):95
Adaptive devices for microcomputers: (part 1), Lynch W, 1(4):80
Adaptive devices for microcomputers: (part 2), Lynch W, 2(1):79
Adaptive devices for microcomputers: (part 3), Lynch WJ, 5(1):96
An update on research in computer-assisted cognitive retraining, Lynch W, 2(4):93
Cognitive prostheses for the brain impaired, Lynch WJ, 5(3):78
Cognitive rehabilitation of severely closed-head-injured patients using computer-assisted and noncomputerized treatment techniques, Batchelor J, Shores EA, Marosszeky JE, Sandanam J, Lovarini M, 3(3):78
Computer access considerations for patients with traumatic brain injury, O'Leary S, 6(3):89
Computer access for the disabled: Entering the new decade, Lynch WJ, 5(2):87
Computer-assisted brain imaging: Rehabilitation applications, Lynch W, 3(3):93
Computer-assisted cognitive retaining, Lynch W, 1(2):77
Computer-assisted memory assessment and rehabilitation, Lynch W, 1(3):78
Computer-assisted visual-perceptual training, Lynch W, 4(2):75
Computers in neuropsychological assessment, Lynch W, 3(1):92
Ethics in computer-assisted cognitive retraining, Lynch W, 4(1):91
The Macintosh as a tool in rehabilitation, Lynch WJ, 6(4):*
Memory assessment: The next step, Lynch W, 3(4):100
The microcomputer as an "orthotic" device for patients with cognitive deficits, Kirsch NL, Levine SP, Fallon-Krueger M, Jaros LA, 2(4):77
Microcomputers and cognitive retraining, Lynch W, 1(1):79

Computers *(cont'd)*
Microcomputers in cognitive rehabilitation: New directions, Lynch WJ, 4(3):92
The necessity of a clinical perspective in the design of computer prostheses, Bergman MM, 6(2):100
Selecting a computer for rehabilitation, Lynch WJ, 5(4):101
The use of microcomputers in the treatment of cognitive-communicative impairments, Story TB, Sbordone RJ, 3(2):45
Concussion
Mechanisms and pathophysiology of cerebral concussion, Gennarelli TA, 1(2):23
Consent
The assessment of clinical competency to consent to medical rehabilitative interventions, Haffey WJ, 4(1):43
Contracture
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):47
Multimodality treatment of joint contractures in patients with severe brain injury: Cost, effectiveness, and integration of therapies in the applications of serial/inhibitive casts, Lehmkuhl LD, Thoi LL, Baize C, Kelley CJ, Krawczyk L, Bontke CF, 5(4):25
The use of tone-reducing casts to prevent joint contractures following severe closed, Moore TJ, Barron J, Moslin P, Bean S, 4(2):63
Convalescence
Family reactions to persistent vegetative state, Jacobs HE, Muir CA, Cline JD, 1(1):57
Conversational discourse
Analysis of conversational discourse in head-injured adults, Coelho CA, Liles BZ, Duffy RJ, 6(2):92
Cortical trauma
Drug-induced modifications of behavioral recovery following cortical trauma, Sutton RL, Weaver MS, Feeney DM, 2(4):50
Cost of injury
Head injuries: Costs and consequences, Max W, MacKenzie EJ, Rice DP, 6(2):76
Craniocerebral injury
Mild closed head injury and cognitive deficits in spinal-cord-injured patients: Incidence and impact, Morris J, Roth E, Davidoff G, 1(2):31

D

Decision making
Law and medicine: The persistent vegetative state, Gilfix M, Gilfix MG, Sinatra KS, 1(1):65
Decubitus ulcer
The care and rehabilitation of the patient in persistent vegetative state, Whyte J, Glenn, MB, 1(1):46
Deformity
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):35
Surgical treatment of lower extremity deformities in adult head-injured patients, Smith CW, Leventhal L, 2(2):53
Delusions
The clinical management of paranoid delusions in postacute traumatic brain-injured patients, Prigatano GP, O'Brien KP, Klonoff PS, 3(3):23
Depression
The choice of antidepressants in depressed survivors of traumatic brain injury, Glenn MB, Wroblewski BA, 4(3):85
Diffuse axonal injury (DAI)
Neuroanatomical correlates of attention and memory disorders in traumatic brain injury: An application of neurobehavioral subtypes, Auerbach SH, 1(3):4
Diplopia
The evaluation of diplopia in head trauma, Neger RE, 4(2):27
Disclosure of medical records
Disclosing medical records, Kolpan KI, 6(3):95
Disruptive behavior
"Atypical" medications for the treatment of disruptive, aggressive behavior in the brain-injured patient, Horn LJ, 2(4):18
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury: (part 2), Glenn MB, 2(2):80
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 1), Glenn MB, 2(1):71
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 3), Glenn MB, 2(3):85
Driving
Can a physician be held liable for certifying a person with a seizure history fit to drive?, Kolpan KI, 3(2):97
Drugs *See* Pharmacology
Dynamic electromyography
Evaluation of upper extremity motor control in spastic brain-injured patients using dynamic electromyography, Perry J, 5(4):13
Dysphagia
Establishing a dysphagia family intervention program for head-injured patients, Hutchins BF, 4(4):64

E

Education
Adopting educational programs for students with head injuries, Cohen SB, 6(1):56
An evaluation of a neuropsychologically based reeducation project for the head-injured child, Light R, 2(1):11
Computer-assisted cognitive retraining, Lynch W, 1(2):77
Educational issues for the head-injured adolescent and young adult, Savage RC, 2(1):1
Educational reintegration and programming for children with head injuries, Cohen SB, 1(4):22
Functional evaluation of adolescent students with traumatic brain injury, Milton SB, Scaglione C, Flanagan T, Cox JI, Rudnick FD, 6(1):35
Higher education: An attainable goal for students who have sustained head injuries, Cook J, 6(1):64
Identification, classification, and placement issues for students with traumatic brain injuries, Savage RC, 6(1):1
Neurobehavioral sequelae following head injury in children: Educational implications, Ewing-Cobbs L, Fletcher JM, Levin HS 1(4):57, 63
Neuropsychological assessment of head-injured children, Fay G, Janesheski J, 1(4):17
On serving students with head injuries: Are we reinvesting a wheel that doesn't roll?, Cooley E, Singer G, 6(1):47

Preparing education professionals for meeting the needs of students with traumatic brain injury, Blosser JI, DePompei R, 6(1):73
The school psychologist's perspective on testing students with traumatic brain injury, Telzrow CF, 6(1):23
School reentry following head injury: Managing the transition from hospital to school, Ylvisaker M, Hartwick P, Stevens M, 6(1):10

Elbow
The orthopedic management of extremity injuries in head trauma, Botte MJ, Moore TJ, 2(2):18
The orthopedic management of spasticity, Keenan MAE, 2(2):67
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):38

Employment
Cognitive impairment and remediation: Implications for employment following traumatic brain injury, Wehman PH, Kreutzer JS, Sale P, West M, Morton MV, Diambra J, 4(3):66
Employment benefits for the traumatic brain-injured, Kolpan KI, 2(1):81
Employment outcomes for participants in a brain injury work reentry program: Preliminary findings, Haffey WJ, Abrams DL, 6(3):24
Exploratory analysis of job separations from supported employment for persons with traumatic brain injury, Sale P, West M, Sherron P, Wehman PH, 6(3):1
Focus on clinical research, Supported employment for persons with traumatic brain injury: A primary report, Wehman PH, Kreutzer JS, Stonnington HH, Wood W, Sherron P, Diambra J, Fry R, Groah C, 3(4):82
Job placement as a treatment component of the vocational rehabilitation process, Fawber HL, Wachter JF Jr, 2(1):27
Practical strategies for vocational reentry after traumatic brain injury, Parente R, Stapleton MC, Wheatley CJ, 6(3):35
Predicting employment in traumatic brain injury following neuropsychological rehabilitation, Ezrachi O, Ben-Yishay Y, Kay T, Diller L, Rattok, 6(3):71
Referrals for supported employment after brain injury: Neuropsychological behavioral, and emotional characteristics, Devany CW, Kreutzer JS, Halberstadt LJ, West DD, 6(3):59
Relationship between employability and vocational outcome after intensive holistic cognitive rehabilitation, Ben-Yishay Y, Silver SM, Piasetsky E, Rattok J, 2(1):35

Endocrine disorders
Pediatric head injury: rehabilitative medical management, Jaffe KM, Hays RM, 1(4):35

Epilepsy
Posttraumatic seizures and posttraumatic epilepsy in children, Kennedy CR, Freeman JM, 1(4):69

Equinovarus deformity
Surgical treatment of lower extremity deformities in adult head-injured patients, Smith CW, Leventhal L, 2(2):54

Ethical issues
Ethical issues and families of brain-injured persons, Romano MD, 4(1):33
Ethics in computer-assisted cognitive retraining, Lynch W, 4(1):91
Legal and ethical issues in psychopharmacologic treatment of traumatic brain injury, Cope DN, 4(1):13
Legal guardianship in traumatic brain injury rehabilitation: Ethical implications, Anderson TP, Fearey MS, 4(1):57
Neurorehabilitation and HIV infection: Clinical and ethical dilemmas, Auerbach V, Jann B, 4(1):23
Societal duty and resource allocation for persons with severe traumatic brain injury, DeJong G, Batavia AI, 4(1):1
Videotaping therapeutic sessions and the right of privacy, Banja JD, Higgins P, 4(1):65

Evoked potential
Brain evoked potentials in coma and the vegetative state, Rappaport M, 1(1):15

Expert witness

A framework for developing a psychotherapy treatment plan with brain-injured patients, Lewis L, 6(4):*
Narcissistic injury in patients with traumatic brain injury, Klonoff PS, Lage GA, 6(4):*
Psychotherapy after mild traumatic brain injury: Relation to the nature and severity of subjective complaints, Cicerone KD, 6(4):*
Psychotherapy and neuropsychological assessment after brain injury, Prigatano GP, Klonoff PS, 3(1):45
Supportive psychotherapy for a patient exhibiting alexia without agraphia, O'Brien KP, Prigatano GP, 6(4):*

Psychotropic agents
Ethical and legal aspects of psychotropic medications in brain injury, Haas JF, 2(4):7

Pupillary reflex
Acute management of the multiply injured head trauma patient, Hanscom DA, 2(2):6

Q

Quadriceps
Surgical treatment of lower extremity deformities in adult head-injured patients, Smith CW, Leventhal L, 2(2):54

R

Reaction
Persistent vegetative state: Principles and techniques for seating and positioning, Shaw, R, 191):31

Reeducation See Education

Reflexes
Evolution and the persistent vegetative state, Berrol S, 1(1):8
Persistent vegetative state: Principles and techniques for seating and positioning, Shaw, R, 1(1):31

Rehabilitation
Awareness and compensation in postacute head injury rehabilitation, Crosson B, Barco PP, Velozo CA, Bolesta MM, Cooper PV, Werts D, Brobeck TC, 4(3):46
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB 1(1):39
Cognitive rehabilitation and community readaptation: Outcomes from two program models, 2(3):51
Functional changes with rehabilitation of very severe traumatic brain injury survivors, Timmons M, Gasquoine L, Scibak JW, 2(3):64
Job placement as a treatment component of the vocational rehabilitation process, Fawber HL, Wachter JF Jr, 2(1):27
Pediatric head injury: Rehabilitative medical management, Jaff KM, Hays RM, 1(4):30
Predicting employment in traumatic brain injury following neuropsychological rehabilitation, Ezrachi O, Ben-Yishay Y, Kay T, Diller L, Rattok, 6(3):71
Rehabilitation effectiveness with severe brain injury: Translating research into policy, Aronow HU, 2(3):24
Rehabilitation of patients with disorders of attention, Wood RL, 1(3):43
Rehabilitation programs for patients with mild head injury: Components, problems, and evaluation, Gronwall D, 1(2):53
Relationship between employability and vocational outcome after intensive holistic cognitive rehabilitation, Ben-Yishay Y, Sivler SM, Piasetsky E, Rattok J, 2(1):35

Respiratory system
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):34
Resuscitation
Acute management of the multiply injured head trauma patient, Hanscom DA, 2(2):7
Robotics
Robotics, Lynch W, 2(2):86

S

School psychologist
The school psychologist's perspective on testing students with traumatic brain injury, Telzrow CF, 6(1):23
Sciatic nerve block
The orthopedic management of spasticity, Keenan MAE, 2(2):64
Seizures
Anticonvulsants for prophylaxis of post-traumatic seizures, Glenn MB, 1(1):73
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB 1(1):43
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 1), Glenn MB, 2(1):72
Posttraumatic seizure and posttraumatic epilepsy in children, Kennedy CR, Freeman JM, 1(4):67
Sensory area
Brain evoked potentials in coma and the vegetative state, Rappaport M, 1(1):18
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):41
Sexuality
Neuroanatomy and neurophysiology of sexual function, Horn LJ, Zasler ND, 5(2):1
Nursing management of sexuality issues, Medlar T, Medlar J, 5(2):46
Ramifications of traumatic brain injury for sexuality, Davis DL, Schneider LK, 5(2):31
Rehabilitative management of sexual dysfunction, Zasler ND, Horn LJ, 5(2):14
Sexual assessment planning, Lefebvre KA, 5(2):25
Sexual functioning and marital adjustment after traumatic brain injury, Garden FH, Bontke CF, Hoffman M, 5(2):52
Sexual values, training, and professional roles, Ducharme S, Gill KM, 5(2):38
A treatment model for sexuality disturbance following brain injury, Blackerby WF, 5(2):73
Shoulder
The orthopedic management of spasticity, Keenan MAE, 2(2):66
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):37
Sitting
Effect of trunk control and alignment on limb function, Fisher B, 2(2):74
Persistent vegetative state: Principles and techniques for seating and positioning, Shaw, R, 1(1):31, 32
Serial casting: Clinical applications for the adult head-injured patient, Zablotny C, Andric MF, Gowland C, 2(2):49
Skull fractures
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):35
Socialization
Networks of social support and the outcome from severe head injury, Kozloff R, 2(3):14
Relationships between personality disorders, social disturbances and physical disability following traumatic brain injury, Lezak MD, 2(1):67
Social role valorization: A model for community reentry, Condeluci A, Gretz-Lasky S, 2(1):49
Social Security benefits
Advocacy and legislative action for head-injured children and their families, Spivack MP, 1(4):45
Neuropsychological assessment and Social Security disability: Writing meaningful reports and documentation, Kodimer C, 3(1):77
Somatosensory evoked potential
Brain evoked potential in coma and the vegetative state, Rappaport M, 1(1):20
Spastic dysarthria
Spastic dysarthria: Revising understanding of the disorder and speech treatment procedures, Aten JL, 3(2):63
Spasticity
Antispasticity medications in the patient with traumatic brain injury, Glenn MB, 1(2):71
Evaluation of upper extremity motor control in spastic brain-injured patients using dynamic electromyography, Keenan ME, Perry J, 5(4):13
Nerve blocks in the treatment of spasticity, Glenn MB, 1(3):72
The orthopedic management of spasticity, Keenan MAE, 2(2):62
Speech
Language and communication disorders following pediatric head injury, Ylvisaker M, 1(4):49
A Language Master for the 1990s, Lynch WJ, 4(4):88
The relationship between speech and swallowing disorders in head-injured patients, Yorkston KM, Honsinger MJ, Mitsuda PM, Hammen V, 4(4):1
Spastic dysarthria: Revising understanding of the disorder and speech treatment procedures, Aten JL, 3(2):63
Spinal cord injury
Mild closed head injury and cognitive deficits in spinal-cord-injured patients: incidence and impact, Morris J, Roth E, Davidoff G, 1(2):31
Standing
Effect of trunk control and alignment on limb function, Fisher B, 2(2):78
Stimulants
The pharmacology of attention and memory, Cope DN, 1(3):38
Substance abuse
Family role in substance abuse and traumatic brain injury rehabilitation, Seaton JD, David CO, 5(3):41
The incidence, impact, and treatment of substance abuse in head trauma rehabilitation, Sparadeo FR, Strauss D, Barth JT, 5(3):1
A model treatment program for the head-injured substance abuser: Preliminary findings, Blackerby WF, Baumgarten A, 5(3):47
The neuropharmacology of inadvertent drug effects in patients with traumatic brain injuries, Gualtieri T, 5(3):32
Substance abuse assessment and treatment in vocational rehabilitation for persons with brain injury, Kreutzer JS, Marwitz JH, Wehman PH, 6(3):12
Surgery
Reconstructive surgery of the upper extremity in the patient with head

trauma, Bott MJ, Keenan MAe, 2(2):35
Surgical treatment of lower extremity deformities in adult head-injured patients, Smith CW, Leventhal L, 2(2):
Swallowing disorders
Evaluation and treatment planning for the head-injured patient with oral intake orders, Logemann JA, 4(4):24
The relationship between speech and swallowing disorders in head-injured patients, Yorkston KM, Honsinger MJ, Mitsuda PM, Hammen V, 4(4):1
Swallowing disorders after traumatic brain injury, Lazarus CL, 4(4):34

T

Technology
Adaptive devices for microcomputers: part I, Lynch W, 1(4):80
An update on research in computer-assisted cognitive retraining, Lynch W, 2(4):93
Computer-assisted cognitive retraining, Lynch W, 2(1):79
Computer-assisted memory assessment and rehabilitation, Lynch W, 1(3):78
Microcomputers and cognitive retraining, Lynch W, 2(2):86
Robotics, Lynch W, 2(2):86
Standard and special word processors as communication aids, Lynch W, 2(3):90
Tendon transfer
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):41
Thumb
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):43
Thumb-in-palm deformity
The orthopedic management of spasticity, Keenan MAE, 2(2):68
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAe, 2(2):43
Tibia
The orthopedic management of extremity injuries in head trauma, Botte MJ, Moore TJ, 2(2):25
Token economy
Perils (hidden and not so hidden) for the token economy, Turnbull J, 3(3):46
Practical token economies, Blackerby WF, 3(3):33
Traction
The orthopedic management of extremity injuries in head trauma, Botte JM, Moore TJ, 2(2):15
Tranquilizers
The orthopedic management of extremity injuries in head trauma, Botte MJ, Moore TJ, 2(2):15
Traumatic brain injury
Antipsychotics and their use after traumatic brain injury, Cardenzas DD, 2(4):43
Antispasticity medications in the patient with traumatic brain injury, Glenn MB, 1(2):71
Chronic hypertension after traumatic brain injury: Pharmacologic options, Glenn MB, Wroblewski BA, 2(4):87
CNS stimulants: applications for traumatic brain injury, Glenn MB, 1(4):74
Cognitive impairment and remediation: Implications for employment following traumatic brain injury, Wehman PH, Kreutzer JS, Sale P, West M, Morton MV, Diambra J, 4(3):66
Cognitive retraining after traumatic brain injury and its role in facilitating awareness, Klonoff PS, O'Brien KP, Prigatano GP, Chiapello DA, Cunningham M, 4(3):37
Exploratory analysis of job separations from supported employment for persons with traumatic brain injury, Sale P, West M, Sherron P, Wehman PH, 6(3):1
Functional changes with rehabilitation of very severe traumatic brain injury survivors, Timmons M, Gasquoine L, Scibak JW, 2(3):64
A laboratory model for testing methods of improving cognitive outcome following traumatic brain injury, Hayes R, Clifton G, Kreutzer JS, 4(3):9
Neuroanatomical correlates of attention and memory disorder in traumatic brain injury: Application of neurobehavioral subtypes, Auerbach SH, 1(3):1
Neuroanatomical correlates of attention and memory disorder in traumatic brain injury: An application of neurobehavioral subtypes, Auerbach SH, 1(3):3
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 1), Glenn MB, 2(1):71
A pharmacological approach to aggressive and disruptive behaviors after traumatic brain injury: (part 2), Glenn MB, 2(2):80
A pharmacologic approach to aggressive and disruptive behaviors after traumatic brain injury (part 3), Glenn MB, 2(3):85
Psychopharmacologic considerations in the treatment of traumatic brain injury, Cope DN, 2(4):1
Psychostimulant pharmacology in traumatic brain injury, Evans RW, Gualtieri CT, 294):29
Relationships between personality disorders, social disturbances, and physical disability following traumatic brain injury, Lezak MD, 2(1):57
Tricyclic antidepressant therapy after traumatic brain injury Mysiw WJ, Jackson RD, 2(4):34
The use of lithium for behavioral and affective disorders after traumatic brain injury, Glenn MB, Joseph AB, 2(4):68
See also Brain injury
Treatment planning
Neuropsychological assessment for treatment planning: A hypothesis-testing approach, Cohen RF, Mapou RL, 3(1):12
Tricyclic antidepressants
Tricyclic antidepressant therapy after traumatic brain injury, Mysiw WJ, Jackson Rd, 2(4):35
Trunk movements *See* Body movements

U

Ulcer
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):46
Ulnar nerve
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):41
Ulnar nerve block
The orthopedic management of spasticity, Keenan MAE, 2(2):64

Urinary tract infection
The care and rehabilitation of the patient in a persistent vegetative state, Whyte J, Glenn, MB, 1(1):45

V

Vascular lesions
Neuroanatomical correlates of attention and memory disorders in traumatic brain injury: An application of neurobehavioral subtypes, Auerbach SH, 1(3):2
Vegetative state
Brian evoked potentials in coma and the vegetative state, Rappaport M, 1(1):15
See also Persistent vegetative state
Vestibular disorders
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):36
Treatment of vestibular disorders in traumatically brain-injured patients, Herdman SJ, 5(4):63
Visual-vestibular systems interaction: Therapeutic implications, Farber SD, Zoltan B, 4(2):1
Videotaping therapy sessions
Videotaping therapeutic sessions and the right of privacy, Banja JD, Higgins P, 4(1):65
Vision
Clinically relevant features of the visual system, Walker KF, 4(2):1
Computer-assisted visual-perceptual training, Lynch W, 4(2):75
Effects of visual deficits on ability to drive in traumatically brain-injured population, Strano CM, 4(2):35
The evaluation of diplopia in head trauma, Neger RE, 4(2):27
Pediatric head injury: Rehabilitative medical management, Jaffe KM, Hays RM, 1(4):36
Rehabilitation of patients with disorder of attention, Wood RL, 1(3):48
Rehabilitative optometric services for persons emerging from coma, Gianutsos R, Perlin R, Mazerolle KA, Trem N, 4(2):17
Retraining the mind's eye, Parente R, Anderson-Parente JK, Shaw B, 4(2):53
Visual-vestibular systems interaction: Therapeutic implications, Farber SD, Zoltan B, 4(2):1
Visual evoked potential
Brain evoked potential in coma and the vegetative state, Rappaport M, 1(1):20
Visual evoked potential ¡pattern abnormalities and disability in severe traumatically brain-injured patients, Rappaport M, Herrero-Backe C, Winterfield K, Rappaport ML, Hemmerle AV, 4(2):45
Visual-motor functions
Neurobehavioral sequelae following head injury in children: Educational implications, Ewing-Cobbs L, Fletcher JM, Levin HS, 1(4):58
Neuropsychological assessment of head-injured children, Fay G, Janesheski J, 1(4):20
Vocational rehabilitation
The contribution of the neuropsychological evaluation to the vocational rehabilitation of the head-injured adult, Kay T, Silver SM, 3(1):65
Employment outcomes for participants in a brain injury work reentry program: Preliminary findings, Haffey WJ, Abrams DL, 6(3):24
Job placement as a treatment component of the vocational rehabilitation process, Fawber HL, Wachter JF Jr, 2(1):27
Practical strategies for vocational reentry after traumatic brain injury, Parente R, Stapleton MC, Wheatley CJ, 6(3):35
Substance abuse assessment and treatment in vocational rehabilitation for persons with brain injury, Kreutzer JS, Marwitz JH, Wehman PH, 6(3):12
Vocational evaluation, Fraser RT, 6(3):46

W

Wheelchair positioning
Persistent vegetative state: Principles and techniques for seating and positioning, Shaw, R, 1(1):33
Wills
Law and medicine: The persistent vegetative state, Gilfix M, Gilfix MG, Sinatra KS, 1(1):66
Word processors
Standard and special word processors as communication aids, Lynch W, 2(3):90
Wrist
The orthopedic management of spasticity, Keenan MAE, 2(2):67
Reconstructive surgery of the upper extremity in the patient with head trauma, Botte MJ, Keenan MAE, 2(2):39
